

Oil Spill Response SOP

Type:	Standards of Operations
First Update:	10 January 2016
Ref No:	AM/OM/014
Revision Date:	29 April. 2023
Department:	Health, Safety and Environment
Facility:	Al Mouj Marina.

Purpose

The purpose of this procedure is to provide a clear protocol and method for our customers for dealing with all types of spills in Al Mouj Marina

Responsibility

The best practices of Spill prevention and response are a collective responsibility between customers and the Marina

Procedure in case of spill

- Inspect effected side and surrounding area to determine cause, severity of spill.
- Contact Marina at 96392323
- Isolate source of spill to reduce further pollution and/or attempt to contain leakage
- If a spill is minor ie 10 liters, please use oil absorbent pads located across the Marina in containers marked SPILL KITS.
- If spill is classified as large, evacuate the scene immediately; the Marina will respond accordingly and will coordinate with the spill response contractor and the government.
- Manager is to assess the response plan. Management also to investigate the cause of spill and take future corrective actions.
